Preface

The National Education Act B.E. 2542 and Amendments B.E. 2545 Section 47 says: "There shall be a system of educational quality assurance to ensure improvement educational quality and standards at all levels. Such a system shall be composed of both internal and external quality assurance. The system, criteria, and methods for quality assurance shall be as stipulated in the ministerial regulations."

Assumption University has established its criteria for quality assurance even before the announcement of the National Education Act B.E. 2542 because it has realized the importance of educational quality and standards especially at the international level.

One of the criteria which can help the University to improve its performance is a job placement survey. The job placement survey becomes a practice of the University conducted by the Institute for Research and Academic Services.

We do hope that this job placement survey of the graduated students in the academic year 2020 will be of interest and usefulness to all people concerned.

Recommendations

- 1. The most serious problem that the graduates have in job application is the unavailability of job information. This problem is a major problem every year. Assumption University should provide them with more information in the University's Career Week. Especially in the COVID-19 epidemic situation, Assumption University should have a job website to provide a convenient channel for graduates.
- 2. It is found that 38.3% of the Bachelor's Degree and 34% of Master's Degree graduates use their knowledge in their jobs at the low level. Thus Assumption University should develop the courses in response to the needs of labor market. The course contents should be up-to-date in order that the graduates can apply them in their jobs.

Rationale

All higher education institutions in Thailand have four main missions, namely, producing graduates, conducting research, providing academic services, and promoting Thai arts and culture. Assumption University as a higher education institution has tried its best to complete these missions at a high standard level.

Producing graduates is directly associated with teaching and learning. In order to conduct good and effective teaching, all instructors, apart from knowing and loving the subjects they teach, need to know and love their students. The instructors need to know the needs and the problems of their students in order to help them to cope with rapid changes especially in the labour market in the Age of Globalization. The awareness of the students' needs and problems will help the instructors to update their courses and improve their teaching methodologies and techniques.

This is the reason why a job placement survey needs to be conducted. This kind of survey is conducted every year with every class of the graduates. It becomes a normal practice. Assumption University assigns the Institute for Research and Academic Services to do it.

The survey is composed of four parts. Part I deals with the profiles of the respondents. Part II, III, and IV deal with the information about job placements, the information about further studies, and recommendations respectively.

This year the servey was conducted with the Class 48 of graduates at all levels. The results of the survey were given to all people concerned.

Objectives of Research

- 1. To survey Job Placements of Assumption University Graduates Class 48.
- 2. To survey their intentions to study for a higher degree.

Expected Benefits

- 1. To know job placements of the graduates at all levels in the labor market.
- 2. To prepare graduating students to enter the labor market and improve their qualifications.
- 3. To know where they intend to go for further studies.
- 4. To use the information to improve the quality of education.

Population and Samples

The samples in this study included the graduates from both undergraduate and graduate programs of Class 48. Out of the total Number of 3,687 graduates, 3,081 were Bachelor's Degree, 551 were Master's Degree, and 55 were Doctoral Degree graduates.

Restrictions of Research

A Job Placement Survey of Assumption University Graduates collected data from graduates on October 15, 2020 to November 2, 2020. If the data had been collected at a longer period, the employment rate would have been higher.

Definitions

"Graduates" means graduates of Class 48 at all levels.

Research Tools

The Institute for Research and Academic Services designed and established the questionnaire. The survey was conducted via online.

Data Analysis

The data was analyzed through descriptive statistics such as Numbers, percentages, averages, and standard deviations.

Recommendations for Improving the University's Performance

- 1. The most serious problem that the graduates have in job application is the unavailability of job information. This problem is a major problem every year. Assumption University should provide them with more information in the University's Career Week. Especially in the COVID-19 epidemic situation, Assumption University should have a job website to provide a convenient channel for graduates.
- 2. It is found that 38.3% of the Bachelor's Degree and 34% of Master's Degree graduates use their knowledge in their jobs at the low level. Thus Assumption University should develop the courses in response to the needs of labor market. The course contents should be up-to-date in order that the graduates can apply them in their jobs.
