## **Recommendations**

1. The most severe problem faced by Bachelor's Degree graduates is the lack of job information (67.86%). This issue is recurrent. Assumption University should provide them with more information during the University's Career Week. Specifically, Assumption University should offer job-related resources such as a website or other channels to provide convenient access for graduates.
2. The research survey found that almost half of Bachelor's Degree graduates apply their knowledge at a medium level (46.29%). Thus, Assumption University should tailor its courses to address the current needs of the labor market.
3. Assumption University should offer a diverse range of elective courses and activities aimed at developing both hard and soft skills essential for success in the workforce.

## **Rationale**

All higher education institutions in Thailand have four main missions, namely, producing graduates, conducting research, providing academic services, and promoting Thai arts and culture. Assumption University as a higher education institution has tried its best to complete these missions at a high standard level.

Producing graduates is directly associated with teaching and learning. In order to conduct good and effective teaching, all instructors, apart from knowing and loving the subjects they teach, need to know and love their students. The instructors need to know the needs and the problems of their students in order to help them to cope with rapid changes especially in the labour market in the Age of Globalization. The awareness of the students' needs and problems will help the instructors to update their courses and improve their teaching methodologies and techniques.

This is the reason why a job placement survey needs to be conducted. This kind of survey is conducted every year with every class of the graduates. It becomes a normal practice. Assumption University assigns the Institute for Research and Academic Services to do it.

The survey is composed of four parts. Part I deals with the profiles of the respondents. Part II, III, and IV deal with the information about job placements, the information about further studies, and recommendations respectively.

This year the survey was conducted with the Class 51 of graduates at all levels. The results of the survey were given to all people concerned.

## **Objectives of Research**

1. To survey Job Placements of Assumption University Graduates Class 51.
2. To survey their intentions to study for a higher degree.

## **Expected Benefits**

1. To know job placements of the graduates at all levels in the labor market.
2. To prepare graduating students to enter the labor market and improve their qualifications.
3. To know where they intend to go for further studies.
4. To use the information to improve the quality of education.

## **Population and Samples**

The samples in this study included the graduates from both undergraduate and graduate programs of Class 51. Out of the total Number of graduates 2,162, 1,496 were Bachelor's Degree graduates, 461 were Master's Degree ones, and 205 were Doctoral Degree.

## **Restrictions of Research**
