Preface

The National Education Act B.E. 2542 and Amendments B.E. 2545 Section 47 says: “There shall be a system of educational quality assurance to ensure improvement educational quality and standards at all levels. Such a system shall be composed of both internal and external quality assurance. The system, criteria, and methods for quality assurance shall be as stipulated in the ministerial regulations.”

Assumption University has established its criteria for quality assurance even before the announcement of the National Education Act B.E. 2542 because it has realized the importance of educational quality and standards especially at the international level.

One of the criteria which can help the University to improve its performance is a job placement survey. The job placement survey becomes a practice of the University conducted by the Institute for Research and Academic Services.

We do hope that this job placement survey of the graduated students in the academic year 2017 will be of interest and usefulness to all people concerned.

Recommendations

1. The unavailability of job information has got the highest score of 95.1%. This problem is the major problem in every year. Assumption University should help them to get the information during the University's Career Week. The promotion of labor market should be conducted during the Career Week regularly. New agencies should be invited to join the event, and all schools and programs should be encouraged to participate in it.
2. It is found that 44.0% of the Bachelor's Degree graduates use knowledge learned in their jobs, so Assumption University should develop courses in response to the needs of labor market. The course contents should be updated in order that the graduates can apply knowledge in their jobs effectively.
3. As for further studies, the graduates at all levels still have high confidence in Assumption University. However, more than half of them have the financial problems. Assumption University should increase the number of scholarships and find more from other organizations to help the needy students.

Rationale

All higher education institutions in Thailand have four main missions, namely, producing graduates, conducting research, providing academic services, and promoting Thai arts and culture. Assumption University as a higher education institution has tried its best to complete these missions at a high standard level.

Producing graduates is directly associated with teaching and learning. In order to conduct good and effective teaching, all instructors, apart from knowing and loving the subjects they teach, need to know and love their students. The instructors need to know the needs and the problems of their students in order to help them to cope with rapid changes especially in the labour market in the Age of Globalization. The awareness of the students' needs and problems will help the instructors to update their courses and improve their teaching methodologies and techniques.

This is the reason why a job placement survey needs to be conducted. This kind of survey is conducted every year with every class of the graduates. It becomes a normal practice. Assumption University assigns the Institute for Research and Academic Services to do it.

The survey is composed of four parts. Part I deals with the profiles of the respondents. Part II, III, and IV deal with the information about job placements, the information about further studies, and recommendations respectively.

This year the survey was conducted with the Class 45 of graduates at all levels. The results of the survey were given to all people concerned.

Objectives of Research

1. To survey Job Placements of Assumption University Graduates Batch 45.
2. To survey their intentions to study for a higher degree.

Expected Benefits

1. To know job placements of the graduates at all levels in the labor market.
2. To prepare graduating students to enter the labor market and improve their qualifications.
3. To know where they intend to go for further studies.
4. To use the information to improve the quality of education.

Population and Samples

The samples in this study included the graduates from both undergraduate and graduate programs of Batch 45. Out of the total Number of 3,057 graduates, 2,358 were Bachelor's Degree, 658 were Master's Degree, and 41 were Doctoral Degree graduates.

Restrictions of Research

A Job Placement Survey of Assumption University Graduates collected data from graduates on October 16, 2017 to February 28, 2018. If the data had been collected at a longer period, the employment rate would have been higher.

Definitions

“**Graduates**” means graduates of Class 45 at all levels.

Research Tools

The Institute for Research and Academic Services designed and established the questionnaire. The survey was conducted via online.

Data Analysis

The data was analyzed through descriptive statistics such as Numbers, percentages, averages, and standard deviations.

Part 4 The Suggestion of Assumption University Graduates

4.1 The class 45 of AU Graduates have given recommendations for improving lecturers as follows:

- Lecturers who are more practical and proficient in English language are needed.
- More American or English lecturers are needed.
- More particular teachers for particular subjects are needed.
- Teaching activities and teaching methods need to be improved.
- More experienced teachers who can share their experiences are needed.
- Lecturers should be open-minded and fair.
- Foreign students need to have good care.

4.2 Feedback on the curriculum has been given as follows:

- More internship projects are needed.
- More activities, case studies, practice, and application are needed in teaching and learning.
- More elective courses should be provided.
- More computers and programming courses should be provided.
- More activities to improve knowledge in social organizations should be promoted.
- More research methodology and practical courses are needed.
- More famous guest speakers should be invited to share their experience with students.
- Individual development and critical thinking should be more emphasized.

4.3 Feedback on the student development activities has been given as follows:

- More various activities should be provided.
- More English activities should be provided.
- More activities for international students should be provided.

Recommendations for Improving the University's Performance

1. The most serious problem that the graduates have in job application is the unavailability of job information (95.1%). This problem is a major problem every year. Assumption University should provide them with more information in the University's Career Week. In that event more new agencies should be invited to join in order that students will get more job information.

2. It is found that almost half of the Bachelor's Degree graduates use their knowledge in working at the medium level (44.0%). Thus Assumption University should develop the courses in response to the needs of labor market. The course contents should be up-to-date in order that the graduates can apply them in their jobs.

3. For further studies, the graduates at all levels still have high confidence in Assumption University. However, more than half of them have the financial problems. The University should increase the number of scholarships and help them to find more scholarships and loans from outside.
